3 :		•
	landing field was newly occupied. Each emplacement consisted of 6 circular earth walls arranged in the shape of a hexagon.	
	No communication tranches were observed between the individual	25 X 1
	emplacements. Each of the four northern caplacements was	
	occupied by a gun with a barrel, about 4 neters long. No	
	muzzle brakes were observed. Between the years 1946 and 1951,	•
	a collecting point for captured guns of various types was	
	located at Herseburg airfield. No fuel supply shipment was observed after 29 June. 1	
	coost voc at our by suits.	
1.	Comment. It has not been determined at which airfield	
	the sircraft of the fighter regiment were stationed between	25 X 1
	late May and early July 1954. For information on the change of occupation at Merseburg airfield,	
	or decapation at tersaping straters	25X1
2,	Comment. The present equipment with radar sets cannot	25 X 1
	be inferred from this report. In late April 1954, 1 Token-	
	type set and 2 Kniferest-type sets were located there.	
	Prior to late April, I Dumbo-type set had additionally been	
, .,	observed there. The Token-type set was last observed on 18	
•	observed there. The Token-type set had additionally been observed there. The Token-type set was last observed on 18 May 1954. It appears that 1 Kniferest-type set has also been
